ABOUT

Penetration testing student with hands-on experience through home labs, CTF challenges, personal cybersecurity projects, and teaching offensive security as a cybersecurity instructor. Experienced with Windows, Linux, Active Directory, networking, and web security. Passionate about problem-solving and continuously developing skills in red teaming, physical security, wireless security, and phishing simulations.

EXPERIENCE

Cybersecurity Instructor Sep 2026 – Present
ITS D.E.MO.S. (Fondazione ITS) Campobasso, Italy

- Delivered a 40-hour beginner course in Italian covering network reconnaissance, Linux, Wi-Fi security, and web vulnerabilities (SQL Injection, Path Traversal, Command Injection).
- Ran guided hands-on labs, taught GRC fundamentals (NIS2, DORA, ISO 27001, PCI-DSS), and gave career guidance.

EDUCATION

Bachelor's Degree in Computer Security and Artificial Intelligence 2026 – 2029
Università degli Studi di Milano Milan, Italy

High School Diploma in Information Technology (Informatica) 2023 – 2026
IISS G. Marconi M.Hack Bari, Italy

- Completed in Italy as a foreign student. Learned Italian while finishing my studies, which was a valuable experience both personally and professionally.

PROJECTS

Red Team Dropbox – Raspberry Pi + Tailscale | mrakashkumar.in/projects/dropbox-raspberry-pi

- Built a Raspberry Pi-based red team dropbox using Tailscale VPN, subnet routing, and remote access to simulate internal network access during security assessments.

Hybrid Active Directory Enterprise Lab | mrakashkumar.in/projects/hybrid-ad-lab

- Built a multi-cloud hybrid Active Directory environment with Windows Server, Entra ID synchronization, Exchange Server, WireGuard mesh VPN, and simulated enterprise attack paths.

BeaconHub – Virtual Wi-Fi Pentesting Lab | mrakashkumar.in/projects/beaconhub

- Developed a virtual Wi-Fi security lab using Vagrant, VirtualBox, `mac80211_hwsim`, hostapd, and aircrack-ng to practice WPA2, WPA2-Enterprise, and WEP testing.

C2 Infrastructure – Redirectors & Traffic Filtering Lab | mrakashkumar.in/articles/c2-deployment

- Deployed a C2 infrastructure lab using Sliver, Mythic, Caddy reverse proxy, and Cloudflare with traffic filtering, redirectors, decoy hosting, and network traffic analysis.

CERTIFICATIONS

Certified Penetration Testing Professional (CPENT) | Certified Red Team Analyst (CRTA)
Multi-Cloud Red Team Analyst (MCRTA) | Junior Penetration Tester (eJPT) | Junior Penetration Tester (PT1)

LANGUAGES

English – Professional Working | **Italian** – B1 (Intermediate)

VOLUNTEERING

Conference Volunteer Oct 2024 & Oct 2025
NoHat Computer Security Conference (BITM) Bergamo, Italy

Event Volunteer Nov 2025
Google DevFest Bari – GDG Bari Bari, Italy
